With this filing, Verizon is introducing Packet At Remote Terminal Service (PARTS), an access service that uses Digital Subscriber Line (DSL) technology. Data traffic generated by a Customer-provided modem is transported to an ATM Port in the end user’s serving wire center, which is connected to the Customer’s Collocation arrangement through a cross connect. PARTS will be available only to locations served by DSL-equipped remote terminals and serving wire centers.

Supporting information as specified in Sections 61.49 of the Commission's Rules is included with this filing. Certain cost information has been redacted as Verizon is seeking confidential treatment in a separate letter. The redacted cost will be filed under seal pursuant to Sections 0.457 and 0.459 of the Commission's rules. In addition, Figure 1 identifies PARTS as a new Price Cap service introduced after July 2, 2002. Pursuant to paragraph 173 of the Commission's decision on pricing flexibility (FCC 99-206 Fifth Report and Order and Further Notice of Proposed Rulemaking, released August 27, 1999), Figure 1 demonstrates the basket and service category into which this service will be properly incorporated in the next Annual Filing in 2003.

This transmittal letter and associated attachments are being filed electronically today via the Federal Communications Commission's Electronic Tariff Filing System.

Payment in the amount of \$655.00 has been electronically transmitted to the Mellon Bank in Pittsburgh, Pennsylvania, in accordance with the fee program procedures. The Form 159 is being transmitted electronically as a proprietary document.

In accordance with the requirements of Section 61.21(a)(3) of the Commission's Rules, the FCC Registration Number (FRN) for Verizon is 0003-7085-00. Verizon is filing this transmittal on behalf of issuing carriers with the following FRNs:
